

SHARK FIN

When cutting point rows with one side of the head, the Lankota Shark Fin guides crop directly into the center of the feeder house. This ensures a smooth crop flow and prevents plugging or loss underneath the side draper belts. The Shark Fin prevents downtime and frustration. Designed for John Deere® Flex Drapers.

Reduce header loss and put more grain in the tank with Lankota's Grain Saver Brush Kits. Kits for John Deere® Flex & Rigid headers, mount using powerful magnets and reduces grain from getting thrown out of the head by the auger. Kits for the John Deere® Flex Drapers, are installed using existing hardware. Brush Kits reduce grain from being discharged from the head by the center feed drum and center draper belt. Lankota Brush Kits do not interfere with the operator's view of the head.
