

STALK STOMPERS®

The standard Stalk Stomper® shoe is 11-1/4" wide and constructed using 7 GA (0.179" thick) Grade 50 steel. Using a stronger steel means the shoe can be lighter than ever. Holes are precut for easy poly liner installation and replacement. Various larger shoes are available for tractor configurations.

FLIP UP MOUNTS

Lankota offers the only patented flip up mount on the market for easy transport and storage of Stalk Stomper® Shoes. Hydraulic lift options available for larger corn heads.

POLY OPTIONAL

UHMW 1/4" poly adds longevity to steel pads. Attached by bolts, not rivets, for quick assembly & replacement.

STALK ROLLERS®

Lankota Stalk Rollers come standard 14" diameter, 1/4" thick and 52" wide; easily covering duals and various tire sizes and configurations. Mounted on folding wings allows lateral flotation in the field and minimal footprint during travel and storage.

TORSION SPRINGS GEN II SHOES

Generation II Stalk Stomper® Shoes utilize a Torsion Spring which allows up to 14" of shoe/roller travel.
