LANPSP603

LANPSP604L & LANPSP604R

LANPSP600BH

LANPSP600EBH

Preparation

If header is installed on combine:

1. Raise header to proper height for installation of kits.
2. Turn combine engine off.
3. Set parking break.

Installation

Refer to Figure 1

1. Remove all black plastic wear plates from all snouts.
2. Install end row outside snout protector (LANPSP604L) to outside of left end snout. Attach using fifteen of the (#14 x 3/4") screws.
3. Repeat on right hand side of head with end row outside snout protector (LANPSP604R).

Note: the 1/4" x 1.25" Bolts and LANPSP603 shims replace the black wear plates that are removed.

Figure 1

Installation

Refer to Figure 2

4. Install end row inside snout protector (LANPSP602R) and two shims (LANPSP603) to inside of left end snout using six of the 1/4" x 1.75" bolts, 1/4" washers & 1/4" nyloc nuts and nine of the #14 x 3/4" screws.
5. Repeat on right hand side of header with end row inside snout protector with (LANPSP602L) and two shims (LANPSP603).

Refer to Figure 3

6. Install standard snout protectors (LANPSP601R) and two shims (LANPSP603) to right side of remaining snouts using eight of the 1/4" x 1.75" bolts, washers & nyloc nuts and seven of #14 x 3/4" screws per side. **Note: There is extra hardware in each bag in case the installer would need it.**
7. Repeat for left side of remaining snouts using standard snout protectors (LANPSP601L).
